BSc thesis components

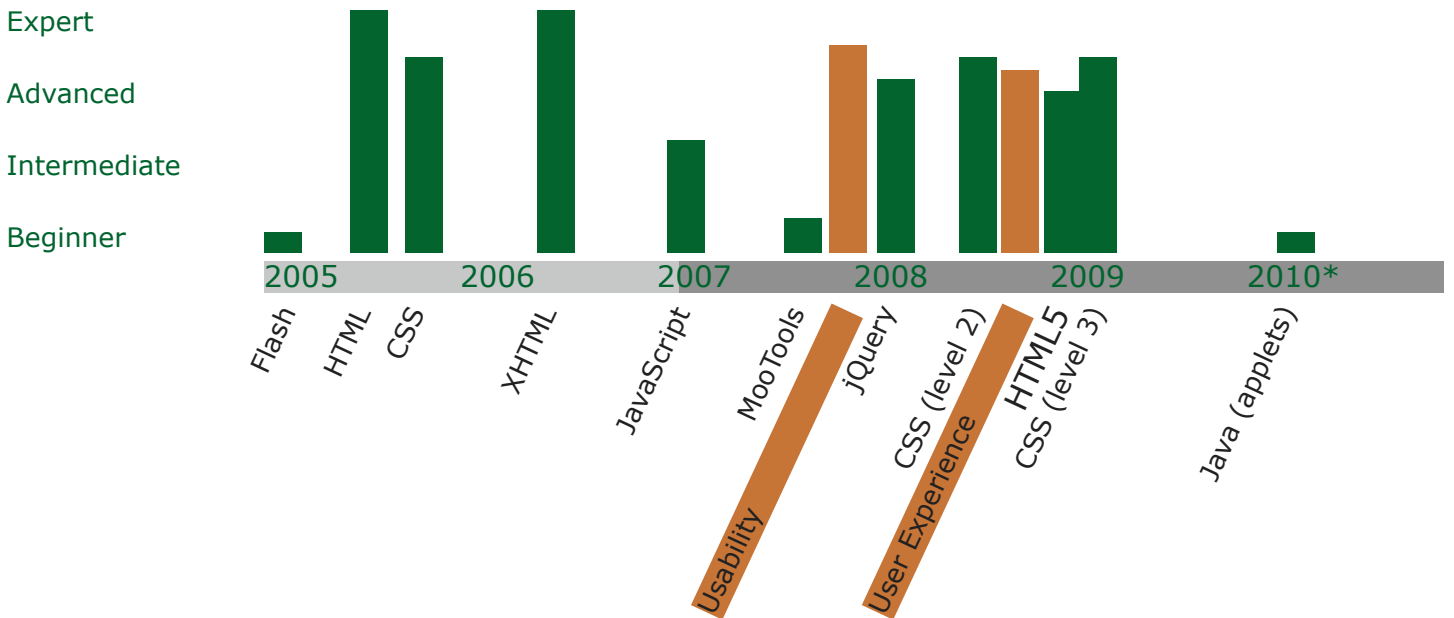

BSc thesis details

"Agile web development with RubyOnRails and web services"

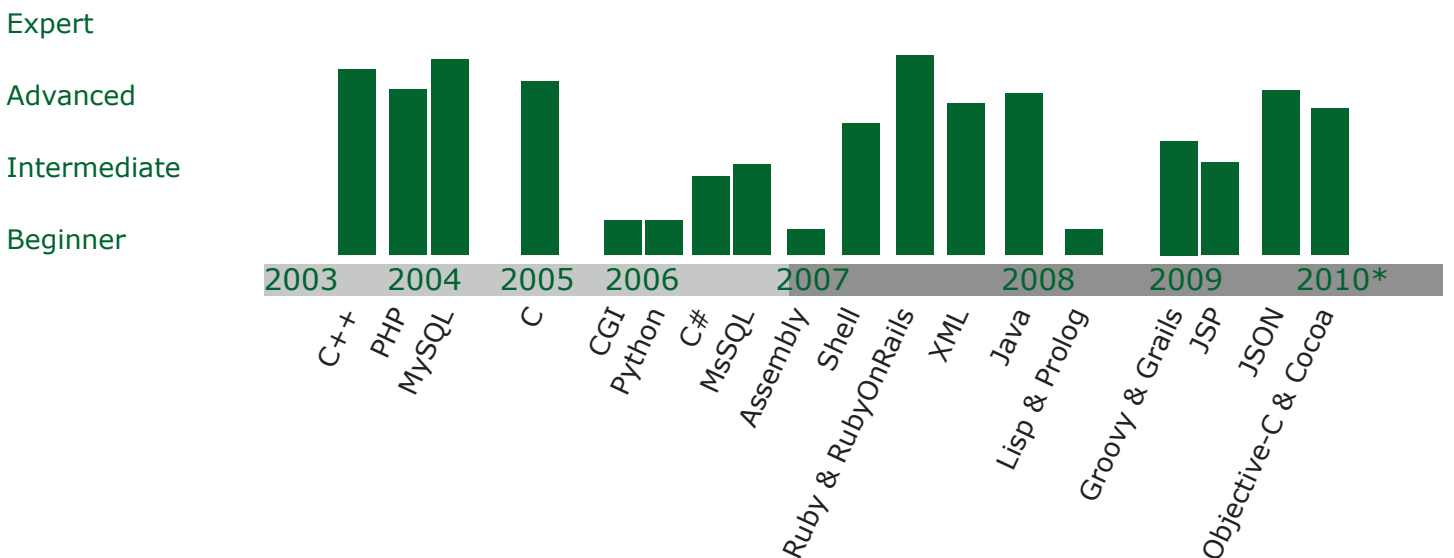

The thesis proposed a system composed of two different applications; A mobile and a web application that would communicate between each other using RESTful web services and JSON as data transmission format, providing means for users to easily search and locate restaurants around the world. JSON is also used to get information from the database and display it in the web application's front end map.

Thesis graded 10 (out of 10)

Front end skills

Back end skills

* year of first contact with the technology / concept

Windows Macintosh
